

International Renaissance Foundation

A person wearing a blue riot suit, a black balaclava, and a green helmet is holding a long pole with a Ukrainian tricolor flag (yellow and blue) attached to it. The person is standing in front of a large, classical-style building with a portico supported by columns. The building has some visible damage, including cracks in the facade. The image is overlaid with a large, semi-transparent green graphic element that resembles a stylized 'U' or a shield.

Ukraine, in defending itself, is defending the values and principles on which the EU was built.

*George Soros «Last Chance for Ukraine and Europe»
(«Project Syndicate», London 30/03/2015)*

Save the New Ukraine

The new Ukraine seeks to become the opposite of the old Ukraine, which was demoralized and riddled with corruption. The transformation has been a rare experiment in participatory democracy; a noble adventure of a people who have rallied to open their nation to modernity, democracy and Europe. And this is just the beginning.

George Soros and Bernard-Henri Lévy «Save the New Ukraine» (The New York Times, 27/01/2015)

◆
The EU must wake up and see that its founding principles are at stake in Ukraine.
◆

Ukraine is something of a miracle. A group of unarmed citizens rose up and overwhelmed a police force with orders to shoot to kill them. We are witnessing the birth of a new nation, a new Ukraine—with a limitless future made possible by people willing to sacrifice their lives for their country. In order for Ukrainians to realize that future, the spirit of the Maidan must be preserved. They will need international support. It won't be easy. Europe can only provide so much help, since the EU itself is in crisis. Russia looms, with its dominant military might, and neither Europe nor the U.S. has shown any appetite for armed conflict in this part of the world. Putin believes in displays of force; he flexes his muscle, and expects people to fall in line. He will do what he can to thwart progress, to keep the country mired in its corrupt past. But that doesn't mean Russia can defeat the new Ukraine. I think people are willing to endure what hardships Putin deals out in order to build a better future here. And my foundation is working with experts in Ukraine to create a strategy for keeping the spirit of the Maidan alive.

Keep the Spirit of the Maidan Alive

Ukraine is something of a miracle. A group of unarmed citizens rose up and overcame a police force with orders to shoot to kill them. They are witnessing the birth of a new nation, a new Ukraine—with a limitless future made possible by people willing to sacrifice their lives for their country.

To appreciate the merits of the new Ukraine you need to have had some personal experience with it. I can speak from personal experience although I must also confess to a bias in its favor. I established a foundation in Ukraine in 1990 even before the country became independent. Its board and staff are composed entirely of Ukrainians and it has deep roots in civil society. I visited the country often, especially in the early years, but not between 2004 and early 2014, when I returned to witness the birth of the new Ukraine. I was immediately impressed by the tremendous improvement in maturity and expertise during that time both in my foundation and in civil society at large. Currently, civic and political engagement is probably higher than anywhere else in Europe. People have proven their willingness to sacrifice their lives for their country. These are the hidden strengths of the new Ukraine that have been overlooked by the West.

THE FOREWORD

The International Renaissance Foundation continues public reporting tradition. We are honored to present you our Annual Report 2014.

That historic year revealed the very foundation and the core of people's power in Ukraine: its civil society. From the very start of the Maidan, civil society and public activism of ordinary people played a decisive role. Representatives of civil society – investigative journalists, corruption fighters, human rights lawyers, think tank experts – formed the first groups of protesters jointly with students, at the very onset of the Revolution of Dignity. It was them who defended the protesters' rights, helped the wounded Maidan participants, and organized public resistance to the use of the anti-civil law in the peak months of the revolution.

The citizens' self-organization practice during the revolutionary events catalyzed the development of a volunteer movement unheard of in its scope, in which non-governmental organizations play an important role. The volunteer movement is voluntary participation of a hundreds and hundreds of thousands citizens in the country's transformation based on new principles.

Think tanks' representatives and numerous experts of non-governmental organizations have taken the lead in this transformation. Last year, they joined their efforts as advisory councils to contribute to the reforms of newly elected authorities, and became the core bodies for development of the country's strategic reform plans. Based upon this movement, the President initiated the establishment of the National Council for Reforms.

For the first time ever, well-known activists from non-governmental organizations, including those who had campaigned for honest parliamentary principles, were elected to the Ukrainian Parliament, Verkhovna Rada, in the last year's parliamentary elections. Along with their colleagues from non-governmental organizations, they are becoming part and parcel of the country's reforms based on new European principles.

The International Renaissance Foundation was actively supporting and contributing to those actions, activities and movements. This is manifested in this report for 2014.

Yevhen Bystrytsky,
Executive Director
of the International Renaissance Foundation.

CENTRAL EUROPEAN UNIVERSITY OPEN SOCIETY PRIZE – 2015

Presented to International Renaissance Foundation
In recognition of its contribution to efforts toward the creation of an open society in Ukraine

Oleksandr Sushko, Chairman of IRF and Yevhen Bystrytsky, Executive Director, were happy to receive this prize in recognition of the outstanding role of civil society organizations that were supported by the Foundation. Congratulations to all of you on this international recognition - employees of the Fund and its numerous programs (expert) councils, chairmen and members of the Supervisory and Executive Boards of all years and to all the friends of the Foundation in Ukraine and abroad.

About the Central European University Open Society Prize

The Central European University Open Society Prize is given to an outstanding individual whose achievements have contributed substantially to the creation of an open society. The award was created and first presented in 1994 to Sir Karl Popper, the eminent philosopher and distinguished originator of the concept.

PREVIOUS RECIPIENTS:

Vaclav Havel, President of the Czech Republic (1991);
Mamphela Ramphele, Managing Director of the World Bank (2000);
Kofi A. Annan, seventh Secretary-General of the United Nations (2008);
Javier Solana, High Representative for Common Foreign and Security Policy/Secretary-General of the Council of the European Union and co-recipient (2011);
Kristalina Georgieva, European Commissioner for International Cooperation, Humanitarian Aid and Crisis Response (2014).

DOCUMENTING HUMAN RIGHTS VIOLATIONS

THE PRICE
OF FREEDOM

PROMOTING PRACTICE OF NON-DISCRIMINATION AT WORK

PROGRAM INITIATIVE «HUMAN RIGHTS AND JUSTICE»

Number of projects: 81

Total amount: 15 023 198 UAH.

The purpose of the Program Initiative is to prevent human rights violations in Ukraine, promote effective anti-discrimination legislation and practice, and promote access of poor and vulnerable groups to justice and legal aid.

Priorities

Access to Justice

- Development of practice of legal assistance guaranteed by the state
- Development of sustainable framework for access to legal information and advice on the local community level

Monitoring and documenting human rights violations

- Study of anti-discrimination practices and development of legislative mechanisms for protection against discrimination on various grounds
- Strengthening capacity of civil society activists to exercise control and preventive function to combat torture and ill treatment in places of detention

Main activities

Documenting human rights violations. Cooperation with the International Criminal Court

From the very beginning of the Maidan events, the Foundation supported human rights organizations that provided legal assistance, monitored and recorded massive human rights

violations that occurred during the peaceful processes and open use of force against people. The need for documenting human rights violations has increased significantly because of the annexation of the Crimea and the beginning of the armed conflict in Eastern Ukraine. Together human rights activists managed to collect a unified database of human rights violations during the events on the Maidan. This became the basis for submission to international judicial bodies and significant help to lawyers representing families of the Heavenly Hundred.

At the initiative and with coordination of the Foundation, 13 human rights organizations (including public initiative «Euromaidan-SOS», Information Centre on Human Rights, NGO «Social Action» Center, NGO «Initiative E +», Ukrainian Helsinki Human Rights Union, Kharkiv Human Rights Group etc.) joined the Coalition of NGOs and initiatives to combat impunity of crimes against humanity. They were the first to submit information with detailed description of events that occurred during the Revolution of Dignity to the International Criminal Court.

In addition to the detailed descriptions of numerous crimes committed by authorities against peaceful citizens, the submission also contains many testimonies of victims, videos and photos of events on the Maidan. The names of those who were responsible for the death of 114 activists of the Maidan, were not yet disclosed to public, national investigation is still underway and brought no results so far.

The purpose of the submission of the Coalition is to convince the International Criminal Court to open an investigation of the “Euromaidan Case”.

Protecting the rights of the Crimean people

As a result of the military aggression and occupation of the Crimea peninsula by the

Russian Federation, there was an urgent need for the immediate implementation of protection of rights and freedoms of Ukrainian citizens who lived there or who were forced to leave the territory of Sevastopol and the Crimea. Also, due to the unique situation with the annexation of the Crimea, Ukrainian human rights environment needed to gain expertise and learn from existing international experience. Lawyers and human rights activists who left the Autonomous Republic of the Crimea, joined the efforts to organize legal aid offices for the Internally Displaced People from the Crimea in Kyiv, where they could receive assistance, and began analyzing legislation to discover existing problems and gaps. The most important questions relate to border crossing between the Crimea and Kherson region, assistance with paperwork, resettling IDPs on the territory of mainland Ukraine. Leading experts of the newly formed NGO «Regional Centre for Human Rights» develop mechanisms to influence policy making, legislation and administrative practice of Ukraine and of the occupational authorities of the Russian Federation on the annexed territories. Based on the results of this initiative, a number of strategic cases, aimed at protecting the rights of persons who were forced to leave the territory of Crimea, were launched. Information and expert events were introduced to increase public participation in the discussion of legislation and regulation regarding the Crimea and to begin a national dialogue on «unrecognized and disputed territories».

Primary legal aid to ATO participants and their families

The Centers of legal information and advice were created with the support of the Foundation on almost the entire territory of Ukraine. They are united in a single network, providing pro-bono primary legal assistance to vulnerable population in their communities. In response to the new challenges associated with the armed conflict in the eastern part of Ukraine, the beginning of mobilization and the creation of volunteer battalions, these centers have undertaken legal support to ATO participants and their families on matters such as obtaining the status of ATO combatants, access to free medical treatment, provision of land and housing, timely and appropriate salary payments, receiving social benefits and so on. The centers are also working on the collection of statistical data and identification of systematic violations of the rights of military by the government agencies and local governments through appropriate monitoring. Consulting and monitoring are accompanied by information campaign and the development of legal aid materials for the military. On the basis of this experience it is planned that the Centers

will develop recommendations for changes to the current legislation and will accompany strategically important trials. As part of this initiative, the Foundation supported two major network projects «Legal aid to the military and internally displaced due to the invasion of Russia into Ukraine» and «Increasing legal protection of the military, participants of ATO and their families by providing legal assistance and monitoring», which involve centers in Kherson, Kharkiv, Chernihiv, Volyn and Kyiv regions.

Renewal of legal assistance on the liberated territories

During the 2009-2014, International Renaissance Foundation contributed to the development of primary legal aid to communities by supporting community organizations in the development and administration of "Centers of Legal Information and Advice" network. After the military conflict in Donbass, citizens in Donetsk and Lugansk regions were effectively deprived of legal protection of the state. The few remaining tools of human rights protection were the centers that continued to provide legal assistance even in the «hottest spots». International Renaissance Foundation in cooperation with the UNDP continued to support eastern centers to facilitate the process of restoring normal life and human rights, social dialogue and establishing stability in the region. The competition selected organizations that for more than six months provided qualified primary legal aid to citizens taking into consideration specific situation and local legal issues (document recovery, destruction of property and infrastructure, social benefits, assistance to IDPs, community reconciliation). In particular, the centers work in Starobelsk, Kreminna, Lysychansk, Kramatorsk, Stanytsia Luhanska, Rubizhne, Dobropillya, Novoaydar. Their activities promoted access to justice and protection of vulnerable population, disseminated educational legal information, coordinated humanitarian assistance,

monitored the restoration of activities and functions of local governments.

Justice for Peace in Donbass

With the escalation of the armed conflict in eastern Ukraine many human rights organizations were forced to leave Donbass. Most of them continued their human rights activities in Kyiv and other regions of Ukraine, focusing on helping IDPs and victims of the armed conflict in the eastern regions of Ukraine. The Foundation directed its activities to support such efforts and consolidate Donetsk and Luhansk NGOs. In addition to working with documents and creating a single electronic database, which can then serve as a primary source of information on crimes within the national and international investigations, a coalition of 14 NGOs and initiatives «Justice for Peace in Donbass» was established. It also focuses on the development of regular thematic reports on human rights violations and restrictions of fundamental freedoms: the right to life, freedom from torture, right to liberty, personal safety and other.

Promoting practice of non-discrimination at work. Corporate Equality Index

On its way to European integration, Ukraine undertook a commitment to implement a comprehensive anti-discrimination legislation. Within the framework of Ukraine's obligations to the EU, including the introduction of procedures to ban discrimination in

the workplace, the All-Ukrainian Charity Organization «Fulcrum» in cooperation with the Coalition to Combat Discrimination, Women's Consortium of Ukraine, the National Assembly of the Disabled of Ukraine, LIGA: LAW legal firm, launched a «Corporate Equality Index». Partners of the Initiative, in addition to the International Renaissance Foundation, were the American Chamber of Commerce in Ukraine and the European Business Association.

The main purpose of the initiative is to help Ukrainian companies to adapt European standards of non-discrimination at work to their needs and to implement efficient and effective mechanism for preventing and combating discrimination in the workplace. Thus, on the basis of the Memorandum of Cooperation between businesses and NGOs, the following results were achieved:

- 90 HR-managers of top companies of Ukraine have been trained on the prevention of discrimination in the workplace;
- Practical recommendations to employers on implementing procedures to ban discrimination in the workplace were developed;
- A series of trainings for separate private companies on policies of equality and non-discrimination in the workplace were conducted at the individual requests of private companies, over 130 people attended these trainings;
- A Web resource for HR-managers and corporate lawyers was launched, which contains professional information on the equality policy implementation and that helps companies to launch respective non-discrimination policies step-by-step.

A special survey on «Corporate Equality Index» among businesses was initiated - a national survey of corporate policies and practices, which aims to assess how Ukrainian enterprises comply with European human rights standards at work.

«Procedural Guarantees for Suspects» Survey

This survey was conducted by «Human rights and justice» program of the International Renaissance Foundation with the Legal Initiative of Open Society (Budapest) and national foundations of the Open Society Foundation in Moldova and Georgia and the University of the West of England.

This survey was conducted simultaneously at six police stations in different regions of Ukraine, where researchers were able to observe and record what happened to detained persons upon their arrival at the police station and how in practice guarantees were provided to the suspects.

The following rights and guarantees were observed:

- The right to information (on existing procedural rights, on the reasons for detention, on crime (offenses) in which the person is suspected, access to the case files);
- The right to legal assistance (timeliness of this right implementation, quality of legal protection, role of counsellors);

- The right not to answer questions;
- The right to have access to necessary medical care;
- The right to use the translation of documents and during oral communication;
- Special guarantees for vulnerable groups of suspects (minors, persons with HIV/AIDS, tuberculosis, patients of substitution therapy, etc.).

Observation during the survey demonstrated that the general problem for Ukraine was the illegal detention (concealment of the fact of detention and failure to document the status of the detainee), which effectively makes it impossible to follow upon any procedural guarantees for detainees. In 57% of cases, the researchers observed that the detention was unlawful.

Also during the survey the following results came out:

- The real explanation of the rights of detainees or verbal explanation does not take place, usually detainees are given the «memo on the rights» and are offered to ask questions if something is not clear, often detained persons are simply asked to sign in the right place. In 35% of cases information on rights and guarantees were not provided at all.
- Before the official interrogation begins, discussions or surveys are conducted with the detained persons etc, only in 20% of cases a lawyer was actually present during the first communication of the detainee with investigators.
- Reported cases of late notification by the regional interior ministry offices of the Centers of the Pro-Bono Secondary Legal Aid on the facts of detention.

- Analysis of behavior of lawyers who work with suspects proves that he or she does not always take an active on the case, in more than 40% of observed cases the suspect's lawyer did not give any advice on the behavior during interrogation; more than 40% of lawyers did not keep written notes during consultations with the client; only in 30% of cases the detained person's lawyer explained the consequences of the decision not to answer questions.

- Systemic problem is the lack of funding in the Interior Ministry Offices to pay for interpretation/translation, which often leads to laying the costs of translation/interpretation on the particular security or law enforcement officer working on the case of the detainee.

- In Ukraine there is no effective mechanism for providing medical care to detained persons.

The introduction of mechanisms to ensure the quality of the pro-bono legal aid system in Ukraine.

The establishment of the effective quality management system is a necessary precondition for the further development of pro-bono legal aid system in Ukraine. For that purpose, on July 1, 2014 the quality standards of the pro-bono secondary legal aid in criminal proceedings were introduced, which shall be complied with by each lawyer working in the system. The introduction of the quality assurance system will ensure that all customers of the system are getting access to high quality service regardless of where it is provided. The Foundation supported the Ukrainian Legal Aid Foundation, which together with the Coordination Center for Legal Aid Provision developed and implemented mechanisms to ensure high quality of legal aid. The project allowed the integration of mechanisms to ensure the quality of legal aid in the overall context of the pro-bono secondary legal aid system.

The project allowed the integration of mechanisms for

ensuring the quality of legal aid in the overall context of the system (Pro-Bono Secondary Legal Aid): a network of 25 quality assurance managers, each regional center employs a manager who organizes training for lawyers, explains the content and objectives of quality assurance standards, together with lawyers produces the most efficient ways of interaction.

In 2014 Foundation in cooperation with the Coordination Center for Legal Aid implemented a series of measures to launch this mechanism, to enable it and to make it an integral part of the system:

- Standards published in a workbook format, convenient for daily use and for suggesting improvements, in 4000 copies, as well as nine evaluation forms for monitoring standards;

- 25 roundtables conducted, one in each region, with a purpose to advocate for the rights of persons for pro-bono high quality legal aid through monitoring standards among stakeholders;

- Strengthened capacities of existing network of 25 quality assurance managers created by Coordination Center of Legal Aid, who work in the regional centers of BPSLA; 25 quality assurance managers trained, sustainable links within their professional networks established;

- During the 77 cluster seminar in the regions, mechanisms of interaction among quality assurance managers and nearly 2,000 lawyers at the district level in each region were developed and presented;

- Standards monitoring tools were developed and tested in the pilot mode; particularly «Observations in Court» tools. During August - September 2014 quality assurance managers of all Pro-Bono Secondary Legal Aid attended 252 trials, watched 255 attorneys at work who acted on

assignments from the centers to implement protection from prosecution. Observations covered courts in 112 cities and towns.

The development of the National Preventive Mechanism

In 2014 the Foundation supported the publication of the second special report on the status of the National Preventive Mechanism in Ukraine (NPM is an independent national body (or several bodies) created and operated under the Optional Protocol to the Convention against Torture (OPCAT), aimed at regular monitoring of all places of captivity to prevent ill-treatment of people held there). The report summarizes the results recorded of over 200 visits to places of detention. In addition to describing the problems identified during monitoring visits, it includes analysis of the implementation of prior recommendations by respective agencies.

An important achievement of this year was a series of visits to places of captivity only together with civil society monitors, who had the mandate of the Parliamentary Commissioner for Human Rights.

Hospices and palliative care departments, geriatric institutions, specialized orphanages and psycho-neurological institutions were added to the list of places where monitoring was conducted.

The good news is the expansion of the environment of

public monitors that now includes more than 100 agents. In 2014, the first meeting of the National Preventive Mechanism monitors took. They developed their vision of the environment and their participation in the NPM. In addition, the first training course for people who want to become monitors of the National Preventive Mechanism was tested.

SUPPORTED PROJECTS

Organization: Bila Tserkva City NGO «Legal Unity» (09100, Kyiv region, Bila Tserkva, Pavlichenko Str., 51, Apt. 78)

PROGRAM INITIATIVE «DEMOCRATIC PRACTICE»

Number of Projects: 114

Total amount: 25 543 934 UAH.

Goal

The goal of this program initiative is the development of effective tools to fight corruption and increase government accountability to citizens.

Priorities

Public agenda for the new country

The Foundation supports activities of independent experts and think tanks aimed at the development of priority reforms for the new Ukrainian government.

Support for think tanks

Initiative on the development of think tanks is implemented by the International Renaissance Foundation in cooperation with the OSF Think Tank Fund with the support of the Swedish International Development Agency (SIDA). Its main goal is to enhance the role of think tanks, transparency of their activities and the level of confidence in them in the process of strategically important decision-making by strengthening their institutional capacity and ability to produce high-quality research and recommendations.

Combating Corruption

This Program Initiative supports the development of amendments to legislation that regulates conflicts of interests in the public sphere, their adoption, advocacy and public control over their implementation. Our goal is to

make any government revenues and expenditures, as well as income and wealth of government officials as open as possible. In order to make the fight against conflict of interest most effective, revenues of government officials and budget expenditure more controlled, we support the aspirations of the public to have free access to all public registers.

Investigative journalism

This Program Initiative supports investigative journalist agencies, as they are the most effective tool for civil society in fighting corruption and getting open access to socially important information.

Main activities

Support for legislative initiatives

One of the main priorities in 2014 was determining legislation and creating conditions for effective combat of manifestations of conflict of interests in the public sphere, disclosure of information on state expenditures and income, wealth of public servants and government officials, promoting free access to the registries of property in the country.

The Foundation actively supported the work of experts on a new version of the Law «On public procurement», adopted by the Verkhovna Rada of Ukraine on April 10, 2014. This Act was the first one to have introduced important anti-corruption norms: a ban on participation in public auctions of persons related to the tender. It has also significantly expanded access to information on government procurement, created conditions for public control over the spending of budget funds.

The real breakthrough in the reform of anti-corruption legislation was the adoption of a package of anti-corruption laws on October 14, 2014. These laws were the result of joint efforts of public experts, Reanimation Reform Package initiative and government agencies. The Foundation has supported, in particular, the development and advocacy of the Laws of Ukraine «On Prevention of Corruption» and «On amendments to some legislative acts of Ukraine on the definition of final beneficiaries of legal entities and public figures». The “Law on Prevention of Corruption” sets rules for public officials to avoid conflicts of interest, defines the objective system of financial control over property status of public officials and creates a specialized preventive agency. The “Law on Beneficiary Owners” greatly complicates the possibility of legalization of proceeds from crime and will allow identification of officials - real estate owners, as well as opens access to the register of real property rights. Ukraine will become the first country in Europe which will create a public register of beneficiary owners. These laws are designed to reform the entire system of prevention and fight against corruption and in the case of proper implementation will lead to significant reduction of corruption in the country.

In addition to legislative activity, the Foundation provided support to holding public monitoring of compliance with procurement and budget spending, including provision for the needs of anti-terrorist operation and internally displaced persons, both on the national and local levels.

SocialBoost NGO, supported by the International Renaissance Foundation, Microsoft and the State Agency for Electronic Governance, has developed and launched the National Open Data Portal. The opening of this data is a major step towards transparency and accountability of government agencies; it provides citizens of Ukraine

with the possibility to control activities of government agencies and to receive actual information on their performance.

The Foundation continues to support and develop investigative journalism, which is an effective tool in the fight against corruption. In particular, the Foundation supported «Our money» project. Its high-profile journalist investigations revealed illegal tenders in «Ukrzaliznytsia», «Ukrghasdobycha» and in the Ministry of Defence of Ukraine and led to the dismissal and arrest of some officials involved in the corruption schemes. Also, the International Renaissance Foundation supported Yanukovichleaks project, under which journalists carried out investigations on the basis of the preserved and restored accounting and financial documents of Mezhyhiria.

International Renaissance Foundation supported activities of journalists of «Donetsk truth» Agency investigating the financial flows of separatist movements in Donetsk region and corruption of local authorities. The abovementioned activities were accompanied by personal

НАШІ ГРОШІ

Національний проект

YanukovychLeaks

threats to project participants from persons whose activities were under investigation. Based on results of journalist investigations, Alex Matsuka, Project Manager, received a prestigious international CJFE International Press Freedom Award (IPFA) from a Canadian jury.

The Foundation also focused on the return of government funds, stolen from Ukraine by previous government. According to the Prosecutor General of Ukraine, during the period of Yanukovych rule, more than 100 billion USD of public funds was «laundered away». Some of them are frozen or arrested in Ukraine and abroad. However, if Ukraine fails to regulate the return of stolen assets, we will face the risk of losing the chance to return the money completely. For that reason the International Renaissance Foundation supported the project of the Center for Combating Corruption that aimed at the development of management model to control seized or frozen assets of corrupt Ukrainian officials, including the development of necessary changes to legislation.

The development of think tanks

In 2014 the International Fund Renaissance in cooperation with the Think Tank Foundation (TTF) and with funding from the Swedish International Development Agency (SIDA) launched the «Initiative of think tanks in Ukraine.» The partners in the Initiative are also ICAP «Unity» and the Office of Think Tanks in Brussels.

The goal of this Initiative, designed for 4 years, is to improve the quality of decision-making and practices

of government agencies through increased role, transparency and confidence in think tanks. The main objective of the Initiative is enhancing the role, «visibility» and confidence in think tanks in the process of decision-making by the government and supporting the development of institutionally sustainable think tanks that are capable of producing high-quality research and recommendations which, in their turn, are in demand by key stakeholders.

During the first year of the Initiative, the International Renaissance Foundation provided 13 mini-grants for institutional development of think tanks so that they could update their own missions and vision, improve their organization management system, bring their statutory documents up to date with current legislation, develop their own strategies, information and fundraising strategies, improve their internal monitoring systems, financial procedures, establish professional 1C accounting systems, etc. In addition, representatives of selected think tanks went through a series of training on organizational development, policy analysis, external communication, non-discrimination and gender issues, environmental protection, anti-corruption and conflict of interests. Some were provided with individual consultations, mentoring, introductory study visits to European think tanks. After the implementation of mini-grants program, organizational and financial audits in the first half of 2015, about ten most successful think tanks will receive two-year grants for institutional development.

«Democratic initiatives named Ilko Kucheriv» Fund conducted a study of cooperation of

government agencies with think tanks in Ukraine. The research allowed determining the leading think tanks whose research and analytical products were in most

demand by government agencies. This research also helped to define what issues and topics were in demand by the government bodies and to identify the main obstacles that currently impede effective development of cooperation of government agencies with think tanks, etc.

One of the important developments in the field of policy analysis in 2014 was the International Conference for Think Tanks. The focus of this event was on the issues of increasing the role of think tanks in the new political environment and on cooperation of think tanks with potential consumers of analytical products.

Last year the development of «Policy Analysis for Democracy» web-portal (policy-analysis.org) continued. This project is being implemented by for the International NGO «Internews Ukraine». Over the past year a training video course on policy analysis was developed, a database of think tanks and experts in policy analysis was compiled, materials of on-line library on policy analysis were systematized and released.

Development of Local Democracy and Self-Organization of People

The substantial intensification of public activity, which was largely caused by the victory of Euromaidan, led to increasing interest of territorial communities in direct participation in solving local problems and the development of self-organization. That is why a network of nine resource centers for community organizations (hereinafter referred to as SOB) focused

on the creation of appropriate legal conditions necessary for such participation, the improvement of understanding of their rights in the field of local democracy, ways to use instruments of local democracy, etc. This network covered Volyn, Dnipropetrovsk, Donetsk, Luhansk, Lviv, Mykolayiv, Rivne and Kherson oblasts and the city of Kyiv. NGO «Association for the Self-Organization» (Odessa) is coordinating activities of the national network.

Considerable attention was paid to the improvement of local regulation that created conditions for the development of specific forms of local democracy. In particular, in 2014 the network of resource centers drafted and lobbied the approval of the Program for the development of community organizations in Dnipropetrovsk for 2014-2017; The Regulation on Bodies of Self-Organization in Dnipropetrovsk; the Program development and reforming public utility sector in Mykolayiv for 2015-2019 that includes, in particular, the aspects of public control and the development of community organization; Program for the promotion of condominium associations and community organizations in the city of Volodymyr-Volynskiy for 2015-2017; Procedure on exercising control by the house committees over the scope and quality of services for maintenance of houses, buildings and areas around houses in the city of Kherson; Regulation on how community organizations exercise quality control over repair and maintenance works in residential buildings of communal property of territorial community of Kyiv; The provisions of the Standing Committee on the activities ensuring the implementation of housing rights of residents of dormitories in the city of Lutsk and more.

Activists of resource centers in their activities have also begun to use court protection to defend the interests of local communities. For example, Resource Center for SOBs administered by the NGO «Our Right» (Lviv), helped leading one of the

Ivano-Frankivsk SOB's lawsuit, which argued for the right of the SOB for the area around the residential building. The abovementioned case was ruled in favor of SOB. In its turn, the Mykolaiv Development Foundation (a resource center for SOBs in Mykolaiv region) addressed a claim to the Central District Court of Mykolaiv for annulment of the resolution of the executive committee of Mykolaiv City Council from 17.04 in 2014, which raised tariffs on city council building maintenance and tariff for garbage collection. According to public opinion, by taking this decision, the City Council violated procedures stipulated by the Law.

Also, in the Mykolaiv region, with the support of the International Renaissance Foundation, 4 mini-projects were carried out with the support of the local resource center. Through advocacy campaigns conducted by SOB «Perluna Hayu» (in the city of Voznesensk), they were able to push the City Council to come up with positive decision on the allocation of 126 thousand UAH for the drilling of wells to provide water supply in one of the neighborhoods. Another organization in Voznesensk («Leader») was able to include one of its leaders into the Administrative Commission. This enabled local community to establish an effective control mechanism with the participation of residents of neighborhoods over sanitary conditions of public areas and recreation zones. SOB «Yalta» (city of Mykolaiv) now undergoes a procedure of delegating powers to it by the Mykolaiv City Council for the subscription of citizens to carry out removal of solid waste and for drawing up reports under articles 152 and 154 of the Code of Ukraine on Administrative Offences. Resource Centers also focus on the issues of internally displaced persons and on the reform of local government in Ukraine. For example, the Luhansk Regional

Resource Centre at the meetings in cities of Svatove, Severodonetsk and Starobilsk held discussions on this issue and stimulated the development in those cities of self-organization movements and consolidation of their efforts to protect the territories, help the army, volunteer movements, assisting IDPs settlers in getting social assistance and pensions and so on. In Kyiv and Luhansk regions discussions were organized around the problems of uniting efforts of rural communities and local governments in the context of administrative-territorial reform and ways to resolve the related potential problems, the role of SOB bodies in these processes.

Much attention was paid to training leaders of community organizations. Besides using traditional forms of training (workshops, seminars, schools, etc.), Kyiv City Resource Center for community organizations used new approaches to organization of training for managers and secretaries of capital city community organization. With the assistance of the Department of Social Communication of the Kyiv City State Administration, for the first time the Kyiv City Center for training of employees of state agencies, local governments, state enterprises, institutions and organizations was involved in the delivery of training.

Support for the improvement of quality of political and electoral processes

In 2014 the Foundation supported TV debates between presidential candidates in Ukraine and the debates between political parties during elections to the Verkhovna Rada of Ukraine. The project was implemented jointly by the First National Channel, «Internews-Ukraine» NGO, «Public Television», «Community Foundation and «Centre UA» NGO. The Foundation has also traditionally supported the «National exit poll» on early parliamentary and presidential elections. The consortium «National exit pol'2014» included the «Democrat-

ic initiatives named after Ilko Kucheriv» Foundation, Kyiv International Institute of Sociology (KIIS) and the Ukrainian Centre for Economic and Political Studies named after Olexander Razumkov. The Foundation supported the work of 100 young international observers, representing civil society organizations of Ukrainian diaspora.

SUPPORTED PROJECTS

Organization: «Donetsk Institute of Information» NGO (83017, Donetsk, Ovnatanyana St., b. 42, Apt. 11, tel. (067) 463-32-11)

PROGRAM INITIATIVE «NEW UKRAINE CIVIC INITIATIVES»

Number of projects: 49

Total amount: 4 359 604 UAH.

Responding to the challenges of the time, the International Renaissance Foundation in September 2014 launched a new program initiative called «New Ukraine Community Initiatives». Its goal is to strengthen and develop new community initiatives within the regional offices of the Foundation in Kharkiv, Odesa and Lviv.

The purpose of the program initiative is strengthening organizational and advocacy capacities of local initiatives of self-organization of citizens that emerged during protests of 2013-2014, and creating conditions for civil dialogue, understanding and reconciliation in Ukraine.

Priorities

- Development of communication capacities of public initiatives, public media and journalism;
- Creation of effective mechanisms of networking, cooperation and exchange of meaningful and relevant experience among community activists in different regions of Ukraine.
- Development of local community media, support of investigative journalism.

Main activities

Support for volunteer initiatives

Civil society in Ukraine in 2014 became stronger than ever. However, it requires additional resources for the development and response to numerous challenges. To maintain solidarity, sustainability and cooperation among Euromaidan initiatives, the Foundation implemented a «rapid response program», which allowed to conduct a Civil Society Forum in Kyiv, Kharkiv and other cities of Ukraine; to document human rights violations and to provide legal assistance during the events of the Maidan and undeclared war in the East; to inform the world about events in Ukraine and to provide resources

and communication support to volunteer movements. As during Euromaidan times, and during the Russian military aggression in the Crimea and eastern Ukraine, we have been witnessing an unprecedented outbreak of civil society activism. Tens of thousands of citizens joined powerful volunteer movements that have undertaken a huge part of supporting ATO, assistance to internally displaced persons, providing them with housing, food, psychological assistance, employment, legal aid and other help. Powerful volunteering has all chances to become one of the driving forces for systemic change in the new Ukraine.

Consolidation of civil society and rapid response to its needs in a context that is constantly changing, in 2014 was one of the priorities of the Foundation. Thus, at the beginning of the year, under the conditions of increased repressions from authorities, at the peak of the protests, there was an obvious need for effective mechanisms of solidarity and self-defense to civil society activists. With the support of the Foundation in February of 2014, the Forum of Solidarity of Civil Society gathered more than 200 civil society activists from all regions of Ukraine. During the Forum they received practical advice on personal safety, legal protection, information security under the conditions of increased repressions from authorities.

Responding to numerous requests from self-organized groups of community activists and volunteers, the Foundation held an open operative competition

«Promoting activity, self-organization and cooperation of volunteer initiatives.» Within the competition the Foundation supported initiatives to help internally displaced persons (IDPs); cultural, informational and educational activities aimed at the involvement of IDPs into community life; psychological counseling for IDPs and participants of the anti-terrorist operation (ATO); providing medical and humanitarian assistance in the conflict zone; communication and coordination between different groups of volunteers. Among volunteer organizations and movements supported by the Foundation were «Vostok SOS», Kharkiv Station, IDPs Center «Romashka», NGO «Elios-Mylist,» «Slobozhanska Varta» Foundation and others.

Creating regional offices of the Foundation

To better respond to the needs of civil society in the regions, to improve communication between local and national NGOs, donors and the government, the Foundation opened regional offices in Kharkiv, Odessa and Lviv. One of the objectives of our regional missions is to support community initiatives in the region, especially those that have arisen during the turbulent socio-political events of 2013-2014. The Foundation has directed its efforts in the regions to help the internally displaced persons and their integration into the community, to support the development of public activity and community involvement in liberated cities of Donbass and independent public journalism.

Total amount: 16 547 644 UAH.

Rapid Response Program (Emergency Fund)

Number of projects: 64

Total amount: 9140391 UAH.

Main activities

Civil society participation in the design, implementation and monitoring of reforms

The events that led to Euromaidan and change of government in Ukraine resulted from the refusal of previous state leaders from the course of European integration, which would have meant in-depth reforms all spheres of public life. The Victory of Maidan has created an enormous opportunity to transform public demand for radical reforms into action.

The Foundation responded to the request by supporting expert initiatives to develop proposals (policies) on urgent reforms and public participation in the implementation of such reforms. At the initiative of the Founder of the

Soros Foundation, Strategic Advisory Group (SAG), which contributed to the work of leading Ukrainian and foreign experts, was established. The goal of the SAG was to provide the government of Ukraine with professional support in the developing high-quality documents on reforms in key areas, in particular - anti-corruption reform, territorial-administrative reform, reform of health care, education, economic deregulation, implementing e-government and reform of police. The Foundation promoted a broad public debate on the developed reform policies. Many of the proposed regulation was included into the relevant sections of the Coalition Agreement of the Parliamentary Majority formed after early parliamentary elections in the fall of 2014, and into the Government Action Plan.

In cooperation with the European Bank for Reconstruction and Development (EBRD), the Foundation proposed the creation of the National Reform Council (NRC) to develop consolidated state policy on reforms and to prioritize reforms. By the Decrees of the President of Ukraine together with the Cabinet of Ministers this proposal was implemented: NRC was launched in December of 2014 and is in the process of becoming an effective tool of reforms. Civil society is also represented on the NRC.

With the assistance of the Foundation and with support from the Cabinet of Ministers of Ukraine, a Coordination

Center for reforms with the goal to create conditions for direct cooperation of the government with civil society initiatives and independent think tanks was established.

Countering the propaganda aggression of Russia

The Russian aggression in the spring of 2014 has sharply actualized the need for objective and balanced information for international audiences about the events in Ukraine. In early March of 2014, when the government lacked the resources and capacity to conduct high-quality communication campaigns, community organizations and initiatives consolidated their efforts to counter Russian propaganda. One of the most successful initiatives in this sphere was the creation of the Ukrainian crisis media center. In the midst of aggression in the Crimea and undeclared war in

the east of Ukraine, the Center, that was also supported by the Foundation, developed into a permanent communication platform and became one of the key channels of information for both international and domestic audiences about the events in Ukraine.

With the support of the Foundation, the Ukrainian crisis media center, the International Centre for Policy Studies, the Ukrainian Liaison Office for Think Tanks in Brussels and other civil society organizations and initiatives conducted a series of public discussions, presentations and public speeches of Ukrainian experts and journalists in the leading countries of the European Union.

EUROPEAN PROGRAM INITIATIVE

Number of projects: 29

Total amount: 5 520 365

INFORMING THE EUROPEAN UNION ON UKRAINE

SUPPORT FOR BUSINESSES

INDEX OF EUROPEAN INTEGRATION OF EASTERN PARTNERSHIP COUNTRIES

PROMOTING IMPLEMENTATION OF THE ASSOCIATION AGREEMENT OF UKRAINE WITH THE EU

CIVIC PLATFORM EU-UKRAINE AND CIVIL SOCIETY FORUM OF THE EASTERN PARTNERSHIP

EUROPEAN PROGRAM INITIATIVE

Number of projects: 29

Total amount: 5 520 365 UAH.

The purpose of this program initiative is to support Ukraine's European integration as a driving force for the effective implementation of pro-European reforms in the areas of democratization, human rights, good governance and the rule of law.

Priorities

Informing the European Union on Ukraine

Informing the EU on the developments in Ukraine, activities of permanent Ukrainian experts in Brussels, developing proposals and arguments for approaching the prospects of Ukraine's membership in the EU.

Index of European integration of Eastern Partnership Countries

The publication of the Index, which tracks the progress of the Eastern Partnership countries through objective indicators of approachment to the EU – by the level of contacts and internal reforms. Developing conclusions to change EU policy in the region. Identification of best practices in reforming the Eastern Partnership countries that can be used by Ukraine.

Promoting proper implementation of the Association Agreement of Ukraine with the EU

We support independent public monitoring of the implementation of the Agreement, development of the government implementation program, adaptation of Ukrainian legislation to European standards. High-quality implementation of this Agreement will be an important argument for opening the prospects of Ukraine's membership in the EU.

Promoting visa-free regime between Ukraine and the EU

In order to get visa-free regime for its citizens, Ukraine must comply with a number of criteria. We support independent public monitoring and provide expert assistance to government agencies for this purpose. While there is a visa regime, we provide monitoring of the implementation of the Agreement on visa facilitation by the consulates of the EU countries.

Civic Platform EU-Ukraine and Civil Society Forum of the Eastern Partnership

Support for the new bilateral Ukraine-EU public platform as an official authority within the Agreement on Association. Support for the National Platform of Civil Society Forum of Eastern Partnership. Development of cooperation with the EU on the civil society level, providing opportunities for civil society to influence decision making in the relations between Ukraine and the EU.

Main activities

Russian aggression against Ukraine is accompanied by large-scale information war and is aimed at both Ukrainian, and the international audiences, especially in Europe, in order to deprive Ukraine of international support.

Therefore, in 2014 in response to this challenge, the Foundation through their own efforts and in collaboration with the International Centre for Policy Studies, Institute of World Policy and Ukrainian media crisis center organized 38 public events abroad on Ukrainian issues (in Brussels, Berlin, Paris, Lyon, Rome, Madrid, Warsaw, Prague, Bratislava, Budapest, Basel). The goal of these events was to convey to European opinion leaders the Ukrainian views on events in Ukraine and to call for more active support of Ukraine by the EU – to help Ukraine combat external aggression and to conduct internal reforms. These public events were accompanied by visual presentations, closed expert discussions, workshops, socializing with journalists.

These projects allowed establishing and strengthening links between experts and opinion leaders of Ukraine and the EU countries, ensured the presence of Ukrainian voice in discussions within the EU about Ukrainian-Russian conflict, exposed many myths of the Russian propaganda among a variety of audiences. In the course of events it was proved that all these efforts were not in vain, because awareness of European politicians, experts, journalists and the public of the threat from Russian aggression increased, and sanctions imposed by the EU were much more powerful than the Kremlin expected.

In March of 2014, a Liaison Office of Ukrainian think tanks in Brussels was opened, which became the permanent establishment and the independent channel of communication and influence in the EU for the Ukrainian analytical sector. In 2014 the Office conducted regular closed consultation with various services and departments of the EU institutions; established partnerships with think tanks in Brussels and the EU member countries; organized several visits

of Ukrainian experts to Brussels; held a series of public events in Brussels, Berlin and Paris on the development of events in Ukraine. Today there are 21 members of the Office of the Ukrainian Analytical Centers; each of them has the ability to deliver their evaluations and recommendations to the EU institutions engaged in assistance to reforms in Ukraine.

European program initiative of the International Renaissance Foundation prepared the Ukrainian part of the international project «Index of European integration of Eastern Partnership countries - 2014», comparing progress of 6 Eastern Partnership countries (Azerbaijan, Armenia, Georgia, Moldova, Ukraine), their relations with the EU at different levels, internal transformations for compliance with EU standards and practices, institutional support for European integration. The first results were presented at the annual Assembly of Civil Society Forum in Batumi in November 2014. Index 2014 shows the increasing differentiation among the EP countries, and that requires a more differentiated policy approach by the EU - in particular, different policy towards countries that in the summer of 2014 signed Association Agreements - Georgia, Moldova, Ukraine. As the Index shows, at the moment of signing Ukraine remained at the third place among the three countries in terms of harmonization of its legislation and public policies with European standards.

Back in 2010 the EU granted Ukraine a list of criteria for visa-free travel - Action Plan on visa liberalization (VLAP). However, these criteria still remain unfulfilled, and accordingly, citizens of Ukraine have to obtain visas for travel to the EU countries. It creates inconveniences, downplays the image of European integration, and impedes the de-

development of human contacts with Europe and familiarity with practices of living by European standards. The European program initiative of the International Renaissance Foundation has for many years supported expert monitoring and advocacy efforts of NGO «Europe without Barriers», aimed at compliance with performance criteria for visa free regime.

These efforts brought results in 2014 when Ukraine finally performed most of the tasks of the first legislative phase of the Action Plan on visa liberalization, and the EU decided to move to the second, executive phase of VLAP. Then experts of «Europe without Barriers» joined the effort to update the National Plan of the VLAP and to monitor its implementation. At the beginning of 2015 it seems that for a visa-free regime for short trips of citizens of Ukraine to the EU, the Ukrainian government should solve a number of problems, particularly in the areas of documents security, personal data protection, migration and border control, law enforcement cooperation with the EU, protection from discrimination, implementation of anti-corruption legislation and establishment of effective specialized institutions to combat corruption.

In previous years, the institutional framework of government policy implementation in the field of European integration was almost destroyed. At the beginning of 2014 the government lacked inter-agency coordination, procedures, harmonization of policies, understanding of the objectives of the the Association Agreement implementation and, ultimately, specialists who could perform these tasks. Thus, when Ukraine signed the Association Agreement with the EU (political part in March and the economic part in June of 2014), the state was not ready for its implementation.

Therefore, in 2014 with the support of the Foundation, a concept of coordination mechanism for European integration policy and of the development of governmental implementation plans of the Association Agreement with the EU was drafted. These expert recommendations were approved by the Cabinet of Ministers of Ukraine and led to the establishment of the Government Office for European integration as a special structure within the Cabinet of Ministers, horizontal interagency coordination through Deputy Ministers for European Integration in each Ministry. This enables approval of action plans for the implementation of the Association Agreement - general plans (CMU №847 of September 17, 2014), and sectoral plans of the implementation of the EU legislation. The overall logic of these changes is that the government's policy of European integration should not be separated, and must be integrated and made the foundation for the government as a whole and of each ministry in particular. Of course, many challenges remain for the practical implementation of the Association Agreement in specific areas, and Ukraine is still only at the beginning

of this path, but last year the government capacity to practically implement the strategic course towards European integration was significantly strengthened.

The Association Agreement with the EU provides an important innovation for civil society in the form of a separate bilateral body of association at the civil society level - Civil Society Platform Ukraine - EU. According to the Agreement, the objective of this Platform is to facilitate its implementation, including by making their assessments, conclusions and recommendations to the government within the framework of the bilateral agreement. Thus, civil society receives an institutional place in bilateral relations with the EU, defined by the Agreement.

Given the importance of this issue, in 2014 the European program initiative of the International Renaissance Foundation got directly involved in a complex dialogue with the European side, which according to the Agreement, is the European Economic and Social Committee and different sectors of civil society of Ukraine on the formation of the Ukrainian Civil Society Platform Ukraine - EU. The representative of the International Renaissance Foundation joined the Initiative Group, which discussed conceptual approaches to the development of the Ukrainian Platform, and subsequently the Organizational Committee of the Constituent Assembly of Ukrainian Platform that took place (with the support of the International Renaissance Foundation) on November 7, 2014. At the end of 2014 an agreement was reached to add to the Ukrainian platform representatives of employers' organizations and trade unions.

The signing of the Association Agreement with the EU has opened new opportunities and benefits for Ukraine, primarily within the free trade

zone - access to the EU market for Ukrainian producers. In April of 2014 the EU introduced unilateral trade preferences for Ukraine. This, however, has significantly complicated trade relations with Russia. This situation dictates (and continues to dictate) the need to increase exports to the EU and other countries - both for the survival of companies (especially SMEs) and to create jobs, to fill budgets and to improve the overall economic situation in the country. However, in early 2014 Ukraine faced the lack of information on practical issues of including businesses into the European Economic Area and opportunities for export to the EU. This problem was especially acute for small and medium-sized businesses, especially in the regions.

European Program Initiative of the International Renaissance has responded to this need by supporting a number of outreach projects on practical aspects of doing business in a free trade zone with the EU. These projects included the publication of practical recommendations

for Ukrainian SMEs and conducting awareness campaigns and training activities in the regions for the target audiences. In particular, the International Renaissance Foundation published user guides «The opening of the EU markets», developed by the experts of the «Open Dialogue» Foundation); «Development of expert potential of the domestic producers of food industry» manual (developed by the NGO «Ukrainian Association of Management Consultants») and «Basic Guide to business internation-

alization and access to markets of the European Union, developed by Oleh Miroshnychenko, expert and former employee of the trade section of the EU Representative Office in Ukraine). These events were conducted in 2014 in Dnipropetrovsk, Zaporizhzhya, Odessa, Kharkiv, Lviv, Kyiv; in early 2015 a series of events will be organized by the NGO «Internews-Ukraine» in various regions to present the «Basic Guide to business internationalization and access to markets of the European Union» and practical experience of Ukrainian businessmen operating on the EU market.

The demand of the time for all Ukrainian media is to improve professionalism of journalists on the subject of European integration. Because of the level of politicization of European integration subject and under the conditions of «information war» imposed on Ukraine, it is hard for some Ukrainian media, especially local ones, to overcome existing prejudices and the anti-European myths deliberately spread by the Russia's media. At the same time, with the signing of the Association Agreement, European integration becomes an important component of internal policies of Ukraine. Reforms in various fields, opening new opportunities for cooperation in the areas of business, education, creation of new jobs, regional development - this is what concerns everybody and is of public interest. However, very often Ukrainian media continue to refer to European integration as to the matter of high poli-

tics, and not to something that is directly relevant to the life of virtually every Ukrainian.

The European program initiative of the International Renaissance Foundation at the end of 2014 supported a number of projects within the «Training for the media: how to cover European integration in an engaging way and without myths» program, aimed at unleashing the potential of media and citizen journalism to teach them how to objectively, professionally and in an interesting way to cover the issues of European integration, especially on a daily level. It is expected that during 2015 more than 250 journalists of various media will have access to appropriate training in the form of workshops, seminars, media schools that will enable them to grow professionally, and for their media to become more competitive.

ACCOUNTABILITY FOR HEALTHCARE SPENDING

STRATEGIC ADVISORY GROUP

BALANCED AND ANTI-DISCRIMINATION DRUG POLICY

We succeeded in increasing
the budget of the Ministry of
Health for the purchase of
medicines

PROGRAM INITIATIVE

«PUBLIC HEALTH»

Number of Projects: 112

Total amount: 23 884 612 UAH.

The purpose of this program initiative is to promote cost-effective and non-discriminatory health care system, transparent and rational use of budgetary funds, ensuring equal access of citizens, including vulnerable groups, to essential medicines and appropriate treatment.

Priorities

Accountability of spendings in the health care system

Development and dissemination of models of transparent and efficient planning and use of budget funds in the health care system.

Balanced and non-discriminatory drug policy

Development and implementation of the legal framework for:

- Adequate access to treatment by controlled drugs (for example, for patients with pain syndrome and patients of substitution support therapy);
- Reducing the level of criminalization of people who use drugs (mitigating the punishment for possession of small drugs doses).

Fighting corruption in public health

Public control over state procurement of essential drugs to treat HIV/AIDS, tuberculosis, hepatitis and cancer. Support for independent supervisory boards of hospitals to monitor the use of public and charitable funds. Analysis of the impact of health reform on access to treatment and corruption.

Legal Empowerment of Vulnerable Groups

Ensuring access of patients, including representatives of vulnerable groups, to high-quality pro-bono legal aid. Capacity building of vulnerable groups to monitor and document human rights violations and to independently represent the interests and rights of the community.

Main activities

«Humanitarian solidarity»

On February 5, 2014, when Ukraine experienced tragic events and was recovering from the first human losses during Euromaidan, Oksana Zabuzhko, Andriy Kurkov, Serhiy Zhadan and Vasyl Knyazevych launched the «Humanitarian Solidarity» Initiative. In their address to launch the initiative they emphasized: «We are here not to judge on who is right and who is guilty in this provoked conflict that threatens civil peace and the very existence of the Ukrainian state. The people, the history will make its judgment. Today, for us and for the whole Ukraine the most important issue is the national solidarity to stop the bloodshed and provide first medical aid to all the victims». Thus we began a program of targeted assistance to victims during the protests, the main objective of the program was to support rehabilitation of the victims. The implementation of the initiative was made possible by donations of Ukrainian citizens and organizations and Embassies of Estonia, Canada, Great

Britain, funds that provided by the «Ukraine Charity» Foundation (United Kingdom) and NGO «New Ukrainian Wave» (Baltimore, USA) and contributions of the International Renaissance Foundation. In general, “Humanitarian Solidarity” received 3129057.63 UAH. Overall within the “Humanitarian solidarity” program of the Foundation assistance was provided to more than 300 victims who needed treatment, prosthetics and rehabilitation.

Combating bribes for free medical services. Institute of Analysis and Advocacy, Poltava

The project conducted a thorough study on “informal payments” in 12 regions of Ukraine: Sumy, Chernihiv, Dnipropetrovsk, Kirovohrad, Cherkasy, Vynnytsia, Zhytomyr, Lviv, Lutsk, Rivne, Poltava, Zaporozhye. Research results were compiled in 12 regional and 1 consolidated analytical report, which describe in detail the issue of informal payments in health care, its analysis, legal aspects, public opinion, official information that unveils scope of the problem:

The amounts of informal payments commensurate with public expenditure on health care. It was established that the amount of «voluntary-compulsory» payments according to the official information of health facilities totalled more than 320 million UAH in 12 regions of Ukraine for 2013. In this case health care facilities only received 42 million UAH or 13,23% of the amount. 66.77% of the money disappeared without trace (20% - administrative costs of the charitable organizations).

However, local authorities usually are not in control of informal payments, information that they provide sometimes is contradictory (for example, in Pyrohov Vinnitsa

Regional Hospital reported nearly 18 million UAH of charitable donations in their tax report, and local authorities recorded only 11 thousand UAH). Sometimes managers of health care institutions also serve as managers of charities that operate at hospitals and collect donations, which is a clear sign of conflict of interests and is a corruption schemes itself.

The analysis of informal payments was developed, a draft Law of Ukraine «On ensuring transparency of charitable organizations operating in HCF» No. 4019 was registered. A strategy to combat the issue of informal payments at HCF for local authorities and on the national level was developed. Understanding the amount of informal payments must be taken into account in health sector reform process, specifically when it comes to the development of health sector finance model.

Patient monitoring of the Ministry of Health procurement tenders, «Patients of Ukraine»

2014 was without exaggeration the year of crisis given the delay in the procurement of drugs at the national level and the decrease of treatment provided to patients. «Patient monitoring of MOH procurement tenders» project supported by the International Renaissance Foundation was able to mobilize key partners to bring up a lively discussion in the media on the subject of delayed procurements, shortage of drugs to treat lethal diseases, to convey to the leadership of the state the need for immediate renewal of procurement. It increased the role of the Charitable Foundation «Patients of Ukraine» as an «umbrella» organization that helped 46 NGOs unite and direct their efforts to achieve socially important objectives in the field of public procurement.

For the first time the efforts of activists engaged in helping children suffering from phenylketonuria, allowed to

advocate procurement of high quality European drugs by the state.

For the first time in the history of Ukraine through the efforts of activists of CF «Patients of Ukraine» and other patient organizations the Chairman of Tender Committee (who also served as the Deputy Minister of Health) was dismissed. Later Minister of Health was dismissed due to his inability to perform his duties and to ensure procurement of medicines.

It was possible to stop sales in Ukraine of «Alfapeh» medication for the treatment of C hepatitis produced by «ValartinFarma» LLC that did not pass clinical tests and to prevent its participation in procurement procedures.

As a result of negotiations held with the Head Office of «Gilead» Company registered a new interferon-free product - «Sovaldi» (Sofosbuvir) in the US, the Company expressed its willingness for the dialogue with the Ministry of Health on the registration of the drug in Ukraine and offered Ukraine a special price.

In addition, the Initiative succeeded in increasing the budget of the Ministry of Health for the procurement of medicines by 4 million UAH.

The project monitored the procurement of 100% of medicines for the treatment of HIV/AIDS, adult and children hepatitis, phenylketonuria, and 80% of medicines to treat tuberculosis in 2014.

CF «Patients of Ukraine» initiated the introduction of provisions into the Coalition Agreement and the into the government program that in 2015 public procurement of medicines of the Ministry of Health would be carried out through international organizations, WHO and UNICEF. With the support of the «Patients of Ukraine» Foundation,

a new mechanism for procurement of medicines in 2015 through international organizations was developed. It will help eliminate corruption in the procurement of drugs, and thus improve patients' access to treatment.

Strategic Advisory Group

Strategic Advisory Group (SDG) on health care reform in Ukraine commenced in August of 2014. The support from the International Renaissance Foundation helped consolidating efforts and resources of the donor and professional communities to develop the document called the «National Strategy of Building a New Health Care system in Ukraine in 2015-2020»(hereinafter - Strategy). SDG platform provided political support to the process through the National Reform Council. It should be noted that SDG on Health Care Reform was initiated by patient community-organization «Patients of Ukraine», which serves as the Secretariat of SDG and is the main driving force behind the advocacy process. The initiative is carried out in close cooperation with the Ministry of Health of Ukraine.

SDG was legitimized by the respective resolutions of the Minister of Health of Ukraine. Its activity is supported by and takes place in cooperation with key donors - the World Bank and the World Health Organisation. The strategy document was discussed during public debates, and made part of the relevant sections of the Coalition Agreement and in the Action Plan of the Government. The International Renaissance Foundation continues to support the work of expert groups in certain areas of the reform.

Drug Policy

Protecting the rights of seriously ill patients and ensuring their access to adequate pain relief is one of the main goals in 2014. Simplification of access to controlled medicines by palliative patients was approved by the Cabinet of Ministers №333 in 2013 and the beginning of domestic morphine tablet production automatically have not resulted in changes of pain management practices. Prescription of pain killers still happens too late and in the wrong dosage, leading to the increased suffering of the patients. Changing the practice of using controlled drugs was only possible through a broad information and education campaign among health professionals and patient groups. Together with the Ministry of Internal Affairs, State Service on Drug Control, Regional Health Care offices experts conducted training in 15 regions of Ukraine on rules and standards that regulate the use of controlled drugs; more than 1,000 telephone and written consultations on issues of supply of controlled drugs and narcotic substances in health care were conducted; information portal for patients and their relatives, which contains the algorithm of upholding the right to pain relief.

ROMA PROGRAM INITIATIVE

Number of projects: 23

Total amount: 3 005 540

THE EFFECTIVE STATE POLICY
ON ROMA

Legal protection of Roma
500 applications of Roma IDPs

The Council of Roma
of Ukraine
47 Roma NGOs

SCHOLARSHIPS OF ROMA EDUCATION FUND
100 GRANTS

ROMA HEALTH AND SOCIAL MEDIATORS

ROMA PROGRAM INITIATIVE

Number of projects: 23

Total amount: 3 005 540 UAH.

The purpose of this Program Initiatives is to support the efforts of NGOs and activists aimed at the involvement of Roma people to social processes and combating Roma discrimination

Priorities

Advocacy and support for effective state policy on Roma

Monitoring the Strategy of protection and integration of the Roma minority into Ukrainian society and its Action Plan, developing recommendations for its implementation. Advocacy of Ukraine's accession to international initiative "Decade of Roma Inclusion"

Legal protection of Roma

Timely and professional pro-bono legal aid to representatives of Roma community.

Promoting reduction of xenophobia and discrimination against Roma.

Support to NGOs to simplify the procedure for obtaining identification documents.

Youth Leadership

The involvement of Roma youth in decision making and in the development of appropriate public policies for Roma youth through the development of youth platform of human rights activists among scholars and graduates of Roma Education Fund.

Organization of schools on youth leadership and protection of human rights, internships in leading think tanks and advocacy organizations Ukraine.

Scholarships of Roma Education Fund

Coordination of scholarships of Roma Education Fund for the Roma people to study at higher educational institutions of Ukraine.

Roma health and social mediators

Improving access of Roma to health care services guaranteed by the state, promoting their positive (non-discriminatory) treatment in health facilities.

Support in getting ID documents, certificates; counselling on other vital issues.

Promoting the model of Roma health mediators at national and regional levels.

Main activities

Roma minority in Ukraine remains one of the most vulnerable. Not having their own state, Romani people are unable to advocate their interests at the state level. The exact number of Roma population in Ukraine is unknown – the official statistics that dates back to 2001, cites 48 000 people. Instead, international non-governmental organizations in Ukraine provide a number from 150 000 to 450 000 Roma people in Ukraine. The lack of statistics makes it difficult to properly assess the real needs of this minority and, therefore, to create opportunities to effectively respond to them. According to the survey conducted by the Kharkiv Institute for Social Research supported by the International Renaissance Foundation in 2012 in Cherkassy and Zakarpattya regions, Roma continue to face problems in obtaining identification documents, exercising their rights to equal access to education, health care and employment, they face discriminatory treatment by local govern-

ments. Roma minority is not homogeneous, and people's needs are often determined by their lifestyle (compact or dispersed) and by the level of their access to basic state guarantees. Common to members of the Roma national community in Ukraine is the issue of dealing with prejudices and stereotypes against Roma prevailing in the society: polls show that most of Ukrainians are intolerant towards members of the Roma national minority. According to the Kyiv International Institute of Sociology in 2013, the index of xenophobia of Ukrainians against Roma is 5.5 out of 7.

In 2014 the Roma Program Initiative of the International Renaissance Foundation directed its activities to protect the rights of Roma and to combat discrimination, to promote their access to education and medicine, to supporting civil society activists in advancing public policy on Roma, as well as prompt response to challenges related to the military conflict in the east of the country, helping internally displaced Roma and combating anti-Romani sentiment that intensified in some regions of Ukraine.

In 2014 the Roma Program Initiative provided operational support to non-governmental organizations «Chachimo» (Kharkiv region), HORY-ENIYE (Dnipropetrovsk region), «RomanoKham» (Zhytomyr region), KETANE (Kherson region) for social and legal support of Roma families who moved into these areas from the East. Initial results of the projects demonstrate that Roma's traditional problems, associated with the lack of identification documents, education and vulnerable social standing considerably complicate the movement, adaptation and implementation of minimum opportunities that are provided to internally displaced persons. The goal of the project was to provide to them with pro-bono legal and social services, and to strengthen coordination efforts of executive government agencies responsible for assisting IDPs. By the end of 2014, the centers that assist Roma IDP

families processed more than 500 applications, including: assistance in obtaining the status of IDPs, social benefits, access to schooling for Roma children. During the project implementation activists also contributed to the resettlement of Roma families, provided mediation services to document the violations of rights of the Roma population.

In regions with the largest compact settlements of Roma, the Foundation continued to support legal aid centers in Roma communities, staffed by professional lawyers of Roma origin. In Transcarpathia grants were given to the NGO «Carpathian Agency of Human Rights «Vested», which operates in a small settlement of Radvanka, Uzhgorod, Syurte village of Uzhgorod district and directly in the city. The cooperation within this project involved the «Romani Cherhen», «Rom Som» organizations and active youth - the leaders of Roma communities in other cities such as Chop and Vynohradiv. Within a separate project, advisory services to Roma residents of the village of Kholmok in Uzhgorod district are provided by «RomanoLunhoTrayo» organization. Through these Centres compact settlements of Roma residents were able to successfully undergo the procedure of obtaining identification documents, which often took place in the court - a fact of identification; efforts of the experienced lawyers from «KAHR «Vested» allowed to obtain official registration of land in the compact Roma settlement of Syurte - for example, several residents of the settlement the Roma families were able to verify that it was possible to become official owners of the land and then the next step would be getting ownership documents for their houses.

The problem of legalization of illegally constructed buildings and privatization of land for Roma in Zakarpattia is one of the most urgent and

pressing issues - often because of inability to undergo necessary procedures and to prepare necessary documents. Working for years, the Centers are trying to find a clear and effective mechanism, including in cooperation with local authorities, to help people to become legal owners of land and real estate, home to their families for several generations. Experience of some projects showed that the help to Roma could not be exhausted only by work with individual appeals - such pilot projects are rather pilot models that are physically unable to meet all the needs of ad-hoc efforts of local governments responsible for strengthening social inclusion in Roma communities. In 2014 the initiative group of Roma activists held an advocacy campaign in the city of Uzhgorod, the results of which have been included in the municipal program «Roma population in 2014-2015». According to the activists, the majority of Program activities do not require funding from the budget. They are mostly organizational and educational. But they are obligatory from now on for representatives of local governments because they were made part of the official regulation.

Cooperation with local authorities in Mukachevo is also improving. Mukachevo is home to the largest compact settlements of Roma in Transpathian district and probably in the whole Ukraine. The problems of the Roma population of the city are also associated with missing documents, social security, employment and, of course, living conditions. So, in addition to legal assistance to residents of compact settlements, the Foundation staff is actively working with the public and the City Council to improve the living conditions of the Roma, the timely removal of garbage and landscaping. Last year the access to primary pro-bono legal aid was also provided to Roma from compact settlements in Svaliava and Perechyn. Similar centers are active in the Odessa region (NGO «Social Legal Aid») and Cherkasy («Romani Rota»).

The lack of adequate access to health care is the next barrier to social development for Roma. Access to health care is often difficult due to the lack of documents, identity, residence registration (these are often informal obstacles in obtaining health care services at the place of residence) and funds needed to cover the additional costs during the treatment. Other reasons may also be called Roma ignorance of their rights and, on the other hand, discriminatory treatment by the medical staff because of the lack of knowledge of specifics of the Roma national minority. Roma health mediators became a bridge between Roma communities and health facilities, ensuring proper communication and timely contact of Roma with the medical system. The presence of such agent in the community, according to residents of compact settlements, enables them to solve many other social and legal issues such as registration documents, information on social assistance, assistance in obtaining identification documents and more. For the purpose of stable operation of such mediators in Roma communities and recognition of their value at the state level, the International Charitable Organization «Roma Women Fund «Chirikli» implements the «Empowering Roma health mediators in Ukraine» project, aimed at promoting this model at the national level.

Access to education for Roma children is one of the cornerstones of sustainable development of Roma communities. Results of surveys of the Institute for Social Research demonstrate that only 50% of Roma children attend school and only 20%-30% of them get basic schooling. According to the Resource Center «Legal Space» that accumulated results of projects supported by the Roma Initiative program (under «Strengthening Roma communities»), the situation with education for Roma children is influenced by external and internal factors. The external factors include: imperfect state of the educational system, which is unable to respond to violations of the rights of Roma to education and

high level of stereotypes about Roma. The internal factors are primarily, nomadic lifestyle in search of seasonal earnings, when the whole family travels, low social status of the families (inability to pay not only for kindergarten or donations to the school, but often for clothing and footwear for school attendance), geographical isolation (if compact, camp residence), lack of motivation to education within the community (often follows from the previous factors). Unfortunately, today there is no single recipe to overcome all the barriers and complex issues that require systemic approaches in most communities, as well as changes of approach to working with Roma children in schools. Ukrainian Charitable Foundation «Step by Step» decided to start with families - with the support of «Early Childhood Development»

(London) and Roma Initiative Program in Zakarpattia, Volyn, Cherkassy and Odessa regions, Centers for parents were opened, where experienced coaches and

teachers conducted classes for parents, teaching them about responsible approach to the education for children from birth to school age.

During the year the «Extending centers for parents in Roma communities» project that works with parents conducted two programs. «Confident parenthood» consists of two programs: for parents of children from birth to 3 years and from 3 to 6 years. Both are based on the belief that parents are the very first teachers for their children. But they also should be trained to be good mentors, interact in the family. «Getting ready for school» helps parents of children aged 4 to 6 years to understand the need for education. They were taught to create family conditions conducive to learning. This is especially beneficial for families where

children do not attend kindergarten. Most attention is paid to the development of basic literacy and arithmetic skills, motivation to learn.

Among the members of the Roma minority are a lot of people with education, profession and desire to help their people overcome social barriers. Such entrepreneurial young people were invited to attend the first School of Human Rights for Roma activists held by youth organization «M'ART» with the support of the Foundation's Roma Program Initiative. 18 participants from different parts of Ukraine spent one week studying basic theory and practical mechanisms for the protection of human rights, dealt in detail with the concept of discrimination, approaches to overcoming prejudices and stereotypes.

Support for youth leadership is one of the focuses of Roma Initiatives program in 2015. The Foundation will help create a platform for Roma human right activists who can joint activities of experienced human rights organizations and implement their own initiatives aimed at the protection of rights of the Roma population against discrimination and promote policies on Roma at the regional and national levels.

In the summer of 2014 an important event for the Roma civil society took place - a conference of the Council of Roma of Ukraine supported by the International Renaissance Foundation. The Council included 47 Roma NGOs from all over Ukraine gathered in Kyiv to discuss the development of public policy on Roma. During the Conference, which was attended by the Government Commissioner on Ethnic Policy, participants issued an appeal to the government, which, in particular, stressed the need for greater involvement of the Roma minority into the development of policies needed to further develop the Action Plan that is part of the Strategy for Social Protection and Integration of Roma national minority into the Ukrainian society by 2020.

In order to enhance public involvement in the development of policies for the Roma minority, the International Renaissance Foundation in cooperation with the Office of Ombudsperson for Human Rights, the European Roma Rights Center announced a competition among NGOs to monitor the implementation of the Roma Strategy Plan of Actions. Winners were encouraged to create an informal NGO platform and present the report together with a package of recommendations in 2015 at the national and international levels. The geography of projects includes Odessa, Dnipropetrovsk, Poltava, Volyn and Transcarpathian region. State policy on national minorities should be more balanced and consistent. This area, like many others, needs substantial reform in the approaches to its implementation - increasing abilities of local governments to carry out their functions of human rights, which are an integral part of the rights of national minorities.

For the 10th consecutive year Roma Program Initiative of the International Renaissance Foundation in cooperation with the Roma Education Fund (Hungary) coordinates in Ukraine a scholarship program «Law and humanities». In 2014 it supported 106 grants for education of Roma stu-

dents in secondary and higher educational institutions of Ukraine. Students were also able to receive additional grants for professional development and public involvement, in particular for internship programs at NGOs in Ukraine and abroad, participation in conferences, language courses, an annual international conference of students, who obtained grants, in Hungary. These students also took part in mini-grant program aimed at mobilization and community development, conducting educational summer camps for children and youth, joining kindergartens and primary schools, empowering youth and women, counselling and legal aid, supporting initiatives aimed at health care, stimulating entrepreneurship and employment, Roma issues awareness campaigns, human rights, combating discrimination, promoting cooperation between local government agencies and local communities to deal with challenges facing Roma community. This year the Roma Program Initiative will strengthen its Roma IDP component, advocacy efforts to improve access to education and health care, as well as the development of youth leadership programs, and will continue to strengthen capacities of NGOs and activists to advocate for the rights of the Roma minority.

SUPPORTED PROJECTS

Organization: «Carpathian Agency of Human Rights «Vested» NGO (88009, Uzhgorod, Svobody Str., b. 5/34, tel. (0312) 64-16-82)

Report of the Independent Auditors on the Summary Financial Statements

To the Board of Directors
International Renaissance Foundation

The accompanying summary financial statements, which comprise the summary statement of financial position as at 31 December 2014, the summary statements of profit or loss and other comprehensive income, changes in fund balance (equity) and cash flows for the year then ended, and related notes, are derived from the audited financial statements of International Renaissance Foundation (the "Foundation") as at and for the year ended 31 December 2014. We expressed an unmodified audit opinion on those financial statements in our report dated 12 May 2015.

The summary financial statements do not contain all the disclosures required by International Financial Reporting Standards. Reading the summary financial statements, therefore, is not a substitute for reading the audited financial statements of the Foundation.

Management's Responsibility for the Summary Financial Statements

Management is responsible for the preparation of a summary of the audited financial statements on the basis described in Note 1 to the summary financial statements.

Auditors' Responsibility

Our responsibility is to express an opinion on the summary financial statements based on our procedures, which were conducted in accordance with International Standard on Auditing (ISA) 810 *Engagements to Report on Summary Financial Statements*.

Opinion

In our opinion, the summary financial statements derived from the audited financial statements of the Foundation as at and for the year ended 31 December 2014 are consistent, in all material respects, with those financial statements, on the basis described in Note 1 to the summary financial statements.

Our auditors' report dated 12 May 2015 on the financial statements as at and for the year ended 31 December 2014 included an emphasis of matter paragraph drawing attention to Note 18 to the financial statements, which describes the political and social unrest and regional tensions that started in November 2013 and escalated in 2014 in Ukraine. The events referred to in Note 18 to the financial statements could adversely affect the Foundation's results and financial position in a manner not currently determinable.

INTERNATIONAL RENAISSANCE FOUNDATION

SUMMARY FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31 DECEMBER 2014

NOTES TO SUMMARY FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2014

1. BASIS OF PREPARATION

These summary financial statements are derived from the audited financial statements of International Renaissance Foundation as at and for the year ended 31 December 2014 prepared in accordance with International Financial Reporting Standards, and comprise the summary statement of financial position as at 31 December 2014, the summary statements of profit or loss and other comprehensive income, changes in fund balance (equity) and cash flows for the year then ended, and related notes.

The Foundation maintains its underlying accounting records in Ukrainian hryvnias ("UAH"). Management identified the Ukrainian hryvnia ("UAH") as the functional currency. Accordingly, all currencies other than UAH are treated as foreign currencies. However, the US dollar remains the presentation currency of International Renaissance Foundation for the benefit of its users.
